

Notification Form for List of ITU Carrier Codes

A Carrier is any operating company that brings into service and maintains international or domestic leased circuits, switched circuits, digital blocks, etc.

ITU believes that all international and domestic carriers for switched circuits today must have an ITU Carrier Identification Code. This code is used to identify a carrier for the purpose of registration of interconnection with other carriers.

In order to develop a listing of ITU Carrier Codes (ICC) which may be used to identify the Carriers when filling out Layer 2 records as explained in Recommendation M.1400, the following Form must be filled by each international or domestic Carrier.

1. **Company full name:**
(the name of carrier)

2. **Company Code:**

--	--	--	--	--	--

(The code by which the carrier wishes to identify itself. This code should be of Roman characters (alpha or alphanumeric (a to z; 0 to 9)), **four to six in length**, and should be unique identifier of a network operator/service provider unique within each country. This code may be one that is in use today, provided it fits the definition.)

3. **Company official address:**

4. **Contact point:**

Name:

Tel.: +

Fax: +

E-mail:
